

March 19 2020

VERA Industrial Access Inc. was a pleasure to work with.

They accommodated us and our requirements into their schedule with no hesitation.

Upon arrival on the first day their Work Safe BC documentation was handed in and a contract ready to sign.

The crew showed up early to get organized for the day and they always showed up with a good attitude, full of energy to get the day started.

Field Level Hazard Assessments were completed each morning before the tasks started.

At the end of the day, time sheets were printed out on their own mini printer and ready to sign.

VERA showed up with all the right equipment needed to get the work done safely and efficiently, and if they needed something more, it was on site the next morning.

There was never any hesitation to do any work we asked of them, and they made sure all the work was completed in an area before moving onto the next.

I can't wait for the next job where I will require their services.

And they have hats, toques, stickers and shirts.
