RE: Letter of Reference; VERA Industrial Rockworks Blasting and Geotechnical Inc.

To Whom it May Concern:

Kinsol Timber Systems contracted VERA Rockworks in early February 2021 for the drilling & installation of rebar that was grouted into place in the tower foundations for the walkway at the Malahat Skywalk Attraction.

Despite the work being conducted in challenging winter conditions, it was completed promptly and efficiently.

Subsequently, their services were further used for rope access work on the walkway and tower installation at various locations and work tasks throughout the project. Their team worked with Kinsol personnel along with our crane operators, to attach the walkway sections into place.

VERA's adherence to safety was exceptional. Their highly qualified crew performed incredibly challenging install and rope access work on the project. Their knowledge and understanding of safety practices related to their work was invaluable to the success of the project.

VERA's safety procedures and WorkSafe BC Regulation were followed for the duration of the work.

We would highly recommend VERA for joining any project team, and will certainly be using them in the future, should the need arise.
